

Sudden Infant Death & Pediatric Sleep

AASPP

26th Annual Conference

September 27, 2017

Preconference Research Session

September 28-30 2017

Conference

Naples Beach Hotel

Naples, Florida

*Jointly Provided by the American Association of SIDS
Prevention Physicians and the Office of Continuing
Medical Education, NCH Healthcare System.*

Alfred Steinschneider Honorary Lecturer: Peter Blair, PhD
Reader in Medical Statistics, University of Bristol, UK

Dr. Blair has a background in Medical Statistics and a particular interest in infant and childhood epidemiology. Born in Manchester, England, he studied Mathematics (BSc Hons) and Medical Statistics (MSc) before moving to Bristol where he completed his doctorate (Epidemiology of Sudden Infant Death Syndrome) in 1997.

From his work on several major observational studies he is a recognized expert in the SIDS field and was made an honorary fellow and advisor to UNICEF (UK) in 2009. In 2014 the Queen's Annual Prize for Further and Higher Education was awarded to the University of Bristol based on Dr. Blair's and his colleague Peter Fleming's contributions in this field. He is the elected Chair of the International Society for the Study and Prevention of Perinatal and Infant Death (ISPID) and chair of the epidemiological working group. He is also a senior consultant methodologist for both the University of Bristol Randomized Trials Collaboration Unit and the NIHR Research Design Service. Dr. Blair lives with his partner Helen and two sons, Jacob & Sam, aged 16 and 19 years.

Learning Objectives

1. Discuss 2 variables that make bed sharing the most dangerous.
2. Describe at least 2 CDC efforts to reduce sleep related deaths.
3. Explain information used by Medical Examiners to help distinguish SIDS/undetermined from suffocation.
4. Describe the methodology of the SMART study and list 1 major finding.
5. List 2 major responses to the AAP guidelines on safe sleep.
6. List 2 new findings of the Oto-Acoustic Signals Investigation Study.
7. Explain the relationship between intermittent hypoxia and risk for SIDS/SUID.
8. Describe how researchers can request data from National center for Child Death Review.
9. List 2 differences in how ALTEs are managed in the US vs. Italy.
10. List 2 variables that predict whether an infant will fail the car seat challenge.
11. Discuss 2 ways maternity ward sudden infant deaths can be reduced.
12. List 2 major SIDS issues facing nurses and RTs today.
13. Give 2 things learned in the literature reviews that will impact your practice or job.

Program Description

This four-day conference covers issues facing professionals concerned about SIDS and other sudden infant deaths. It is also for those providing care for infants at increased risk for sudden death. There are sessions on the latest research findings and practice guidelines. There are lectures, discussion sessions, panels and article reviews. This is truly a participant structured conference.

Pre-Conference Research Session

Wednesday September 27, 3:00-5:00

This accredited session is being held to discuss the current research projects in which AASPP is participating along with other's research in progress. Everyone is welcomed to attend this accredited session. Please pre-register. Space is limited.

Target Audience

This annual conference was developed for neonatologists, pediatric pulmonologists, pediatric neurologists, nurses, respiratory therapists and other healthcare professionals who have an interest in sudden infant death and sleep disorders.

Banquet

The banquet will be from 7-10 pm on Thursday night at the Naples Beach Hotel. A banquet ticket is included with each paid registration. Guest tickets can be purchased for an additional \$75. A DJ will play for your listening and dancing pleasure.
