INFORMATION & ACCREDITATION

Conference Learning Objectives

1. Explain how Artificial Intelligence can lead to a better understanding of SIDS.
2. Explain at least 3 CDC findings about SUID/SIDS.
3. List 2 strategies to reduce preterm SUID deaths and explain why they work.
4. Explain at least one finding relating SIDS to genetics.
5. Describe the advantages of using Newborn Blood Serotonin as a Biomarker for SIDS Risk.
6. Describe 2 baby products on the market that are unsafe for infant sleep.
7. Describe the NICHD Safe to Sleep Project.
8. List 2 important things to be learned about SIDS from studies on Central Serotonin and Autoresuscitation Capabilities.
9. List 2 major SIDS issues facing nurses and RTs today.
10. Explain what is known about the effect on the newborn of maternal opiate exposure.

Program Description

This four-day conference covers issues facing professionals concerned about SIDS and other sudden infant deaths. It is also for those providing care for infants at increased risk for sudden death. There are sessions on the latest research findings and practice guidelines. There are lectures, discussion sessions, panels and article reviews. This is truly a participant structured conference.

Pre-Conference Research Session

Wednesday 3:00-5:00

This accredited session is being held to discuss the current research projects in which AASPP is participating along with other's research in progress. Everyone is welcomed to attend this accredited session.

Banquet

The banquet will be from 7-10 pm on Thursday night at the Pink Shell Resort. A banquet ticket is included with each paid registration. Guest tickets can be purchased for an additional \$75. A DJ will play for your listening and dancing pleasure.

Target Audience

This annual conference was developed for neonatologists, pediatric pulmonologists, pediatric neurologists, nurses, respiratory therapists and other healthcare professionals who have an interest in sudden infant death and sleep disorders.
